Gulf countries offering international investment opportunities in health care

Dubai

shortage of hospitals, clinics and related infrastructure, along with an increasing population and official push to promote medical tourism, makes the health care sector in the Gulf region a promising area for investment.

The increasing emphasis on health care as part of economic plans is exemplified in the UAE Vision 2021 and Saudi Vision 2030. Both countries are promoting public-private partnerships to finance health-care projects.

"Dubai needs 1,000 hospital beds in the next five years just to keep pace with the growing population growth, which translates to seven hospitals, at around 150 beds per hospital," said Craig Plumb, head of research at Jones Lang LaSalle MENA.
